

Project Hub

A collection of frontend projects built with HTML, CSS and JavaScript, organized by category with live demos.

Live Demo: your-username.github.io/projecthub

 Project Hub screenshot

Features

- Dark and light mode, and your choice is saved using localStorage
- Responsive layout with a hamburger menu on mobile
- Live search that filters projects as you type
- Projects organized into HTML, CSS and JavaScript categories
- Card hover effects and smooth theme transitions

Tech Stack

- HTML5
- CSS3 (Flexbox, CSS variables, media queries)

- Vanilla JavaScript (DOM manipulation, localStorage)

Projects Included

Project	Category	Description
Calculator	JavaScript	Basic arithmetic calculator
To-Do List	JavaScript	Add and manage tasks
Animated Button	CSS	Hover effect using CSS transitions

Folder Structure

```
projecthub/  
├─ index.html  
├─ html.html  
├─ css.html  
├─ js.html  
├─ css/  
│   └─ style.css  
├─ js/  
│   └─ script.js  
└─ screenshots/  
    └─ home.png
```

Run Locally

```
git clone https://github.com/your-  
username/projecthub.git  
cd projecthub
```

Then open `index.html` in your browser. No installation needed.

What I Learned

- Building a responsive navbar without any framework
- Managing themes with CSS variables
- Saving user preferences with localStorage
- Filtering DOM elements with JavaScript

Future Improvements

- Add more projects (weather app, quiz, notes app)
- Add a footer with social links
- Add project tags and filters
